Professional Summary

Bilingual (English/Spanish) IT Support and Service Desk Specialist with a B.S. in Computer Science and hands-on experience resolving hardware, software, and networking issues in dynamic environments. Practiced in Active Directory, ServiceNow, and Jira through mentorship-based labs, with proven skill in troubleshooting, user assistance, and AV system support. Known for strong communication, analytical thinking, and a proactive approach to maintaining uptime and end-user satisfaction.

Professional Experience

IT Support Specialist (Full-Time) – Teaneck Cinemas, Teaneck, NJ | July 2019 – Present

- Serve as primary technical contact for theater systems, providing end-user support and ensuring 24/7 uptime of RTS, POS, and GDC projection systems, as well as desktop and laptop support for Windows/macOS.
- Troubleshoot and resolve 20+ weekly technical issues involving hardware, software, and network connectivity.
- Maintain 99% system uptime through proactive maintenance and real-time incident response.
- Assist with staff onboarding/offboarding and provide training on system tools and best practices.
- Coordinate with vendors for equipment repairs, software updates, and digital content deployment.
- Direct AV and operational logistics for special events hosting 300+ patrons, ensuring seamless execution.

Field Technician – Event Operations (Freelance) – Asphalt Hoops, Teaneck, NJ | July 2022 – Present

- Execute technical setup, calibration, and maintenance of routers, laptops, scoreboards, and PA systems.
- Deliver on-site and remote support during tournaments, minimizing downtime and maintaining system reliability.
- Develop standardized setup procedures, reducing prep time by 25% and lowering support calls by 40%.
- Train referees and event operators on resolving common system issues independently.

Technical Training & Lab Experience

- Practiced user account management, group policy configuration, and permission setup in Active Directory sandbox environments.
- Simulated ticket creation, escalation, and resolution workflows using ServiceNow and Jira.
- Gained familiarity with incident lifecycle management, ticket triage, and documentation best practices.
- Configured virtual environments to replicate Tier 1 & Tier 2 help desk workflows, including password resets and remote desktop sessions.

Projects

PC Troubleshooting Guide (HTML/CSS) – Designed a responsive HTML knowledge base outlining diagnostic procedures for common PC issues, hosted on GitHub Pages.

PC Disassembly & Reassembly Project – Completed a full teardown and reassembly of a Dell desktop with detailed photo documentation to demonstrate hardware proficiency.

Education & Certifications

B.S. in Computer Science – Montclair State University, Montclair, NJ (Sept 2022 – Jan 2025)

A.S. in Liberal Arts and Science – Bergen Community College, Paramus, NJ (Sept 2019 – May 2022)
